Q1. What is the first step before starting a visual effects project?

- a) Rendering the final output
- b) Understanding client requirements
- c) Purchasing software
- d) Creating effects directly

Q2. Why is reviewing the project brief important?

- a) To increase project cost
- b) To understand objectives and deliverables
- c) To avoid communication
- d) To skip planning

Q3. Which document helps in planning project timelines?

- a) Storyboard
- b) Budget sheet
- c) Work schedule
- d) Invoice

Q4. During workflow planning, resources include:

- a) Equipment and software only
- b) Human resources, equipment, and software
- c) Clients only
- d) Office furniture only

Q5. What should be done if project requirements are unclear?

- a) Ignore them
- b) Make assumptions
- c) Seek clarification from the supervisor/client
- d) Stop the project permanently

Q6. Why should equipment be checked before use?

- a) To increase workload
- b) To ensure proper functioning and safety
- c) To reduce quality
- d) To delay production

Q7. Which of the following is an example of production material?

- a) Video footage
- b) Office chair
- c) Water bottle
- d) Calendar

Q8. Proper storage of equipment helps to:

- a) Reduce lifespan
- b) Prevent damage and loss
- c) Increase repair costs
- d) Create confusion

Q9. What should be done when equipment malfunctions?

- a) Continue using it
- b) Report it immediately
- c) Hide the issue
- d) Throw it away without reporting

Q10. Maintaining an inventory helps in:

- a) Tracking equipment and materials
- b) Increasing wastage
- c) Avoiding accountability
- d) Delaying projects

Q11. What is the primary purpose of visual effects (VFX)?

- a) To reduce video quality
- b) To create or enhance visual elements in a scene
- c) To remove audio
- d) To shorten production time only

Q12. Chroma keying is commonly known as:

- a) Motion tracking
- b) Green screen compositing
- c) Color grading
- d) Rendering

Q13. Which process combines multiple visual elements into a single scene?

- a) Compositing
- b) Encoding
- c) Cropping
- d) Printing

Q14. Motion tracking is used to:

- a) Follow movement within footage
- b) Increase sound quality
- c) Create invoices
- d) Manage inventory

Q15. Rendering refers to:

- | | |
|-----------------------|--|
| a) Recording audio | b) Processing and generating the final visual output |
| c) Cleaning equipment | d) Writing scripts |

Q16. Which file format is commonly used for high-quality video output?

- | | |
|--------|---------------------|
| a) MP4 | b) MOV |
| c) AVI | d) All of the above |

Q17. Which software is widely used for 3D modeling and animation?

- | | |
|------------------|------------|
| a) Autodesk Maya | b) MS Word |
| c) PowerPoint | d) Paint |

Q18. Which skill is most important for a VFX Artist?

- | | |
|------------------------|---------------------|
| a) Attention to detail | b) Fast typing only |
| c) Sales skills | d) Cooking skills |

Q19. Which hardware component significantly affects VFX rendering performance?

- | | |
|-----------------------------------|-------------|
| a) Graphics Processing Unit (GPU) | b) Keyboard |
| c) Mouse Pad | d) Webcam |

Q20. Why is color correction important in VFX?

- | | |
|--|-------------------------------|
| a) To improve consistency and visual appearance of footage | b) To increase internet speed |
| c) To reduce audio noise | d) To compress files |
